Allow researchers to unlock the true value of Middle Eastern academic research with the power of AI.

Key features include:

Contextual Linking, Highlighting & Annotation
Interactive research tools for linking, highlighting, and annotating documents.

Personal Bookshelves
Organize resources and access them anytime across devices.

Unlimited Simultaneous Access
Institution-wide access with no user limitations.

Usage Analytics Dashboard
Track usage patterns to improve resource management.

Automatic Citations
Seamless citation generation via EndNote, RefWorks, and Citavi.

Counter & Sushi Reports
Standardized usage analytics for transparent reporting.

Flexible Authentication
Secure access via IP, proxy, remote access, and OpenAthens.

Discovery Platform Indexing
Indexed in ProQuest Summon and EBSCO EDS for higher visibility.

The Al Manhal AI Assistant empowers researchers, educators, students, policymakers, and knowledge professionals to seamlessly explore authentic Arabic scholarly content on Middle Eastern topics, all in their preferred language.

By combining advanced multilingual AI with Al Manhal's trusted collection of peer-reviewed books, journals, theses, and reports, the AI Assistant enables users to discover, understand, and engage with high-quality academic research without requiring proficiency in Arabic. Researchers can ask questions in natural language, receive contextual summaries, uncover relevant publications across languages, and access direct references to the original source materials. By removing language barriers while preserving academic integrity, the Al Manhal AI Assistant opens the door to authentic Middle Eastern scholarship, making it more accessible, discoverable, and impactful for institutions and researchers worldwide.

Who Benefits from the Al Manhal AI Assistant?

- Middle East Scholars
- Global Strategic Studies and Think Tanks
- Faculty & Curriculum Designers
- Librarians & Research Support Staff
- Lawyers and Legal Researchers
- Journalists and Media Organizations
- Policy Analysts and Government Agencies

What are the main tenets of Islamic Finance?

Reasoning

Main Tenets of Islamic Finance

Islamic finance operates under core principles derived from Shariah (Islamic law), with the following key tenets:

1. **Prohibition of Riba (Usury/Interest)**
   - Considered the central tenet, riba is strictly forbidden as an "unjustifiable increase of capital" in loans or sales *(Mohamed Rosli Mohamed Sain | Mohammad Mafizur Rahman | Rasheda Khanam, 2014)*[1] . This prohibition is rooted in Quranic injunctions (Surah Al-Baqara 2:275-276) *(Mohamed Rosli Mohamed Sain | Mohammad Mafizur Rahman | Rasheda Khanam, 2014)*[2] .
2. **Avoidance of Gharar (Excessive Uncertainty)**
   - Contracts must avoid deceptive ambiguity and speculative risk *(Najeeb Zada | Salim Ur Rahman, 2016)*[3] .
3. **Prohibition of Maysir (Gambling/Speculation)**

Licensing Options

The Al Manhal AI Assistant is available as a premium enhancement to the Al Manhal Academic Complete subscription, offering flexible licensing options designed to meet the diverse needs of universities, research institutions, libraries, and consortia. Whether supporting a single institution or a nationwide initiative, our scalable licensing models ensure seamless access to AI-powered research capabilities while maximizing the value of your Al Manhal subscription. Organizations can also evaluate the platform through complimentary trials with dedicated AI usage analytics, providing valuable insights into adoption, engagement, and research impact before full implementation.

Flexible Licensing Models

Annual AI Subscription (FTE-Based)

Scalable pricing aligned with your institution's Full-Time Equivalent (FTE) user population.

AI + Content Bundles

Customized packages combining the Al Manhal AI Assistant with Al Manhal's comprehensive scholarly collections.

National License & Consortium Models

Cost-effective licensing designed for government initiatives, library consortia, and multi-campus institutions.

Complimentary Trial Access

Experience the platform with dedicated AI usage statistics to evaluate adoption, engagement, and research outcomes.

About Kezana

Kezana empowers publishers, universities, and research institutions with AI-driven research platforms, trusted academic content from the Middle East, North Africa, and Türkiye, and intelligent digital library solutions that transform how knowledge is accessed, managed, and shared worldwide.

Global academic discourse has long overlooked institutions and voices from the Middle East. Using Retrieval-Augmented Generation, the Al Manhal AI Assistant surfaces insights from thousands of authentic Middle Eastern scholarly publications in any language, bringing regional research into global conversations on politics, society, and development - closing the knowledge gap and giving regional perspectives the global weight they deserve.
